## SUMMARY

I have learned Javascript and React js. I have basic knowledge of Html, Css, git/github. I am looking for the opportunity to work in a professional environment that will help me to progress into full-stack role.

## PROJECTS

### Phone Directory:

This project is made in React Js that allows you to add the contact number and name of a person. User can see the list of all the contacts added by him/her along with the contact number of each.

### To-Do List In Javascript:

This project allows you to add/delete/edit the task. You can easily manage your work after completing the task you can delete it also.

### Weather App:

This project is React based and it will show you the weather of a particular location. I have used the OpenWeatherApi in this project. That allows me the information regarding weather of a particular location and using axios Api I used that info in my app.

### TicTacToe:

This is javascript based project. Each time a player plays, it will check the moves of that player if he makes triplet horizontally, vertically, diagonally then he will be the winner.

### NotesApp:

It is javascript based app. This allows you for the CRUD operations. User can add/Delete/edit the notes.
